17,69M x 16,68M

FALL HEIGHT:
8'4"
0M

Technical drawing of the 'PLAYCUBES' playground structure, showing a complex arrangement of climbing frames, slides, and sensory equipment. The drawing includes dimensions in feet and inches, and meters, and a scale bar.

Dimensions (Feet and Inches / Meters):

- Overall width: 58' [17.69M]
- Overall height: 54'-8" [16.68M]
- Top left section: 6'-2" [1.87M], 6'-3" [1.90M], 6'-2" [1.88M]
- Left side: 6'-7" [2.00M], 6'-4" [1.93M], 6'-1" [1.86M], 6'-2" [1.89M]
- Bottom left: 6'-5" [1.97M], 6'-4" [1.92M]
- Bottom center: 7'-11" [2.41M]
- Right side: 6'-2" [1.88M], 6' [1.84M], 6'-1" [1.86M], 6'-2" [1.88M]

Equipment and Features:

- DISCO SPINNER
- LEG LIFT
- FLEX GRIP CROSSING W/ ACCESS LADDER
- TRANSFER STATION W/ STEP
- TRI-VERSE CLIMBER
- KPE PETAL POST TOPPER
- TWISTED CLIMBER
- PLAYCUBES SENSORY SET #1
- PLAYCUBES SENSORY SET #2
- SMALL POLY CLIMBER
- ROCKY RIDGE CLIMBER
- PLASTIC PLAYCUBES
- PLAYCUBES TRANSITION CLIMBER
- ADA STAIRS
- PEDESTAL W/ OFFSET ACCESS GATE
- HOPSCOTCH CLIMBER
- ROLLER SLIDE
- PLAYCUBES MIGHTY DECENT SLIDE

Scale Bar:

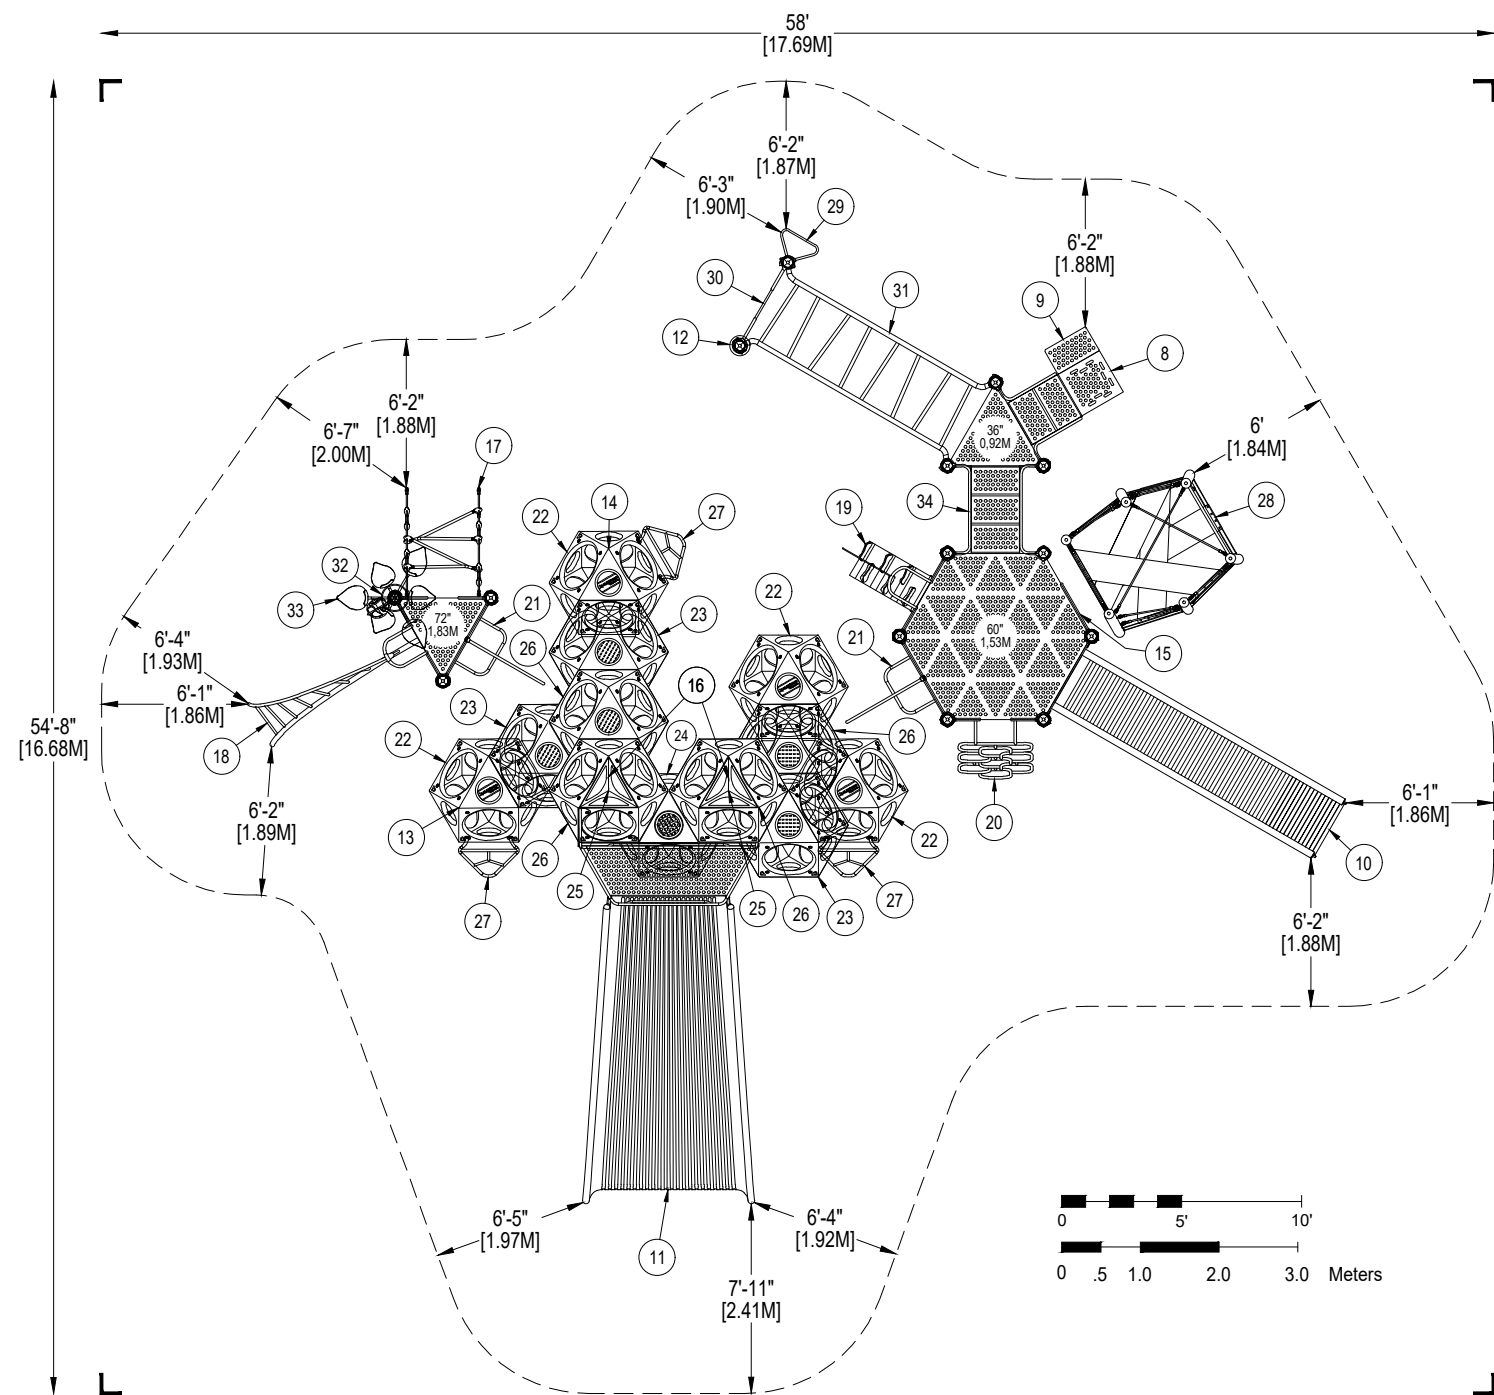

- 0 to 10 feet
- 0 to 3.0 meters

SITE NOTES:

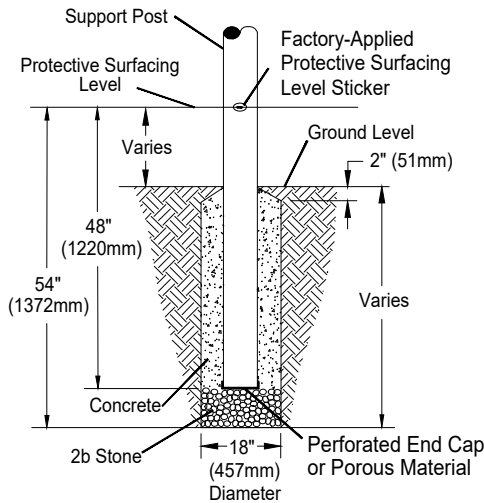

- 1) The site plan provided must be checked against the actual site area to ensure that placement of your structure meets required clearances.
- 2) The dimensions labeled are for location of footing holes, not exact placement of equipment. Assemble, plumb, and level equipment before pouring concrete.
- 3) There must be a minimum distance of 6' (1830mm) between any obstacle, sidewalk, etc., and your structure.
- 4) Slides must have a use zone that extends out from the lower exit section of the slide a distance that is at least 6' (1830mm) or equal to the vertical distance from the highest point of the sliding surface to the top of the protective surfacing, whichever is greater. The slide use zone should not extend greater than 8' (2438mm) from the end of the lower exit section.
- 5) The complete area, including the space under and around the equipment, must be covered with an impact attenuating material. See the 1997 publication, "Handbook for Public Playground Safety", published by the U.S. Consumer Product Safety Commission, for guidelines and recommendations on the type and depth of surfacing material. For a copy of the "Handbook for Public Playground Safety", write to: **U.S. Consumer Product Safety Commission**
Office of Information and Public Affairs
Washington, D.C. 20207

INSTALLATION NOTES:

- 1) Paved surfaces, such as asphalt and concrete, are not acceptable for use under your structure.
- 2) It is the consumer's responsibility to check with local utilities prior to excavating footings for any underground utility lines that may exist within the installation area.
- 3) It is the consumer's responsibility to check local soil conditions and drainage within the site area. Inquire with local contractors for appropriate recommendations.
- 4) If the structure is to be installed across uneven terrain, maintain the support post mark for protective surfacing level at the lowest grade. Adjust other footings accordingly.
- 5) The base of footings must be below frost lines.
- 6) Do not encase the bottom of support posts in concrete. Place all posts directly on packed stone.
- 7) Assemble the entire structure before pouring concrete unless specifically instructed to do so in the individual component installation instructions.
- 8) Read completely the installation instructions provided with your structure prior to beginning construction.
